PROFESSIONAL SUMMARY

Software Engineer (graduated December 2025) with about two years of hands-on experience building mobile, web and serverless solutions. Works with Flutter/Dart, React, and Java/Spring Boot, and has built on AWS (API Gateway, Lambda, DynamoDB, S3, Cognito, IAM). Experienced in process automation and tool integration with Make, Airtable, Tally, Google Workspace and ChatGPT, and in AI-assisted development guided by upfront documentation (PRD/TRD). Targeting junior full stack, backend, mobile and AI integration roles.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Dart, SQL, Python (foundational)

Frontend & Mobile: React, Next.js, Flutter, HTML, CSS, Tailwind CSS, WordPress, Elementor

Backend & APIs: Spring Boot, REST APIs, Supabase

Cloud (AWS): API Gateway, Lambda, DynamoDB, RDS, S3, Cognito, IAM; serverless architecture; Vercel (hosting)

Automation & AI: Make (Integromat), Airtable, Tally, Google Workspace, ChatGPT; AI-assisted development with documentation-first workflow (PRD/TRD)

Practices & Tools: Git, Visual Studio Code, Scrum, Continuous Integration (CI), unit testing, UX/UI implementation

Spoken Languages: Spanish (native), English (B1)

PROFESSIONAL EXPERIENCE

Web Developer **Sep 2025 – Jan 2026**

INSTALAAB SAS | Armenia, Colombia

Developed an end-to-end tourism web platform with WordPress and Elementor, from planning through publication. Designed and structured pages with a focus on user experience (UX), basic SEO, and responsive design. Configured and administered plugins to improve site performance, navigation, and content management.

Full Stack Developer **Aug 2023 – Sep 2025**

Mirus Smart Solutions | Armenia, Colombia

Contributed to the design and implementation of an automated enterprise platform on AWS (API Gateway, Lambda, DynamoDB, RDS, S3, Cognito), configuring IAM policies and roles for secure access to cloud services, and built backend services iteratively and incrementally, prioritizing continuous delivery of value to the team. Implemented features for the native Android/iOS app with Flutter and Dart, based on UX/UI mockups defined by the design team, while designing and implementing a mobile Minimum Viable Product (MVP) integrating Flutter with AWS serverless services (API Gateway, Lambda, DynamoDB, S3) for business data management; supported UX improvements and data-driven decisions based on client feedback.

Designed and implemented automation workflows in Make, integrating Airtable, Tally, Google Workspace, and ChatGPT to process and analyze information, and developed an error classification and tracking system that improved the efficiency of incident resolution, helping remove manual process dependencies, reducing processing time, and improving handling of large data volumes. Additionally, wrote unit tests and validated use cases to support software quality, proposed and implemented improvements to the Continuous Integration (CI) workflow that improved the team's development times, and took part in weekly Scrum technical meetings for task tracking and use-case validation.

SELECTED PROJECTS

Colchones Posada – Product Catalog and Online Store **2026 – Present**

Personal project for a family business | colchonesposada.lat

- Designing and developing, with AI-assisted tools, a catalog and online sales website for a mattress manufacturer, following a documentation-first approach: business diagnosis, phased feature roadmap, user flows, technical architecture and full documentation before coding.
- Stack: Next.js, TypeScript, Tailwind CSS, Supabase and Vercel.
- Built an interactive prototype approved by the business owner before starting development.

Capstone Project – React Web Application **2025**

Corporación Universitaria Empresarial Alexander von Humboldt (academic project)

- Developed a web application with React in a multidisciplinary team using Scrum, as the final-semester capstone project.
- Designed the system architecture, inspired by the model used by Bancolombia. Recognized as Best Capstone Project (Proyecto Nuclear) of the semester.

Academic Web Projects **2022 – 2025**

Corporación Universitaria Empresarial Alexander von Humboldt (academic projects)

- Built multiple web projects with plain HTML, CSS and JavaScript, covering page layout, interactivity and basic API consumption.

EDUCATION

Ingeniero de Software (Software Engineering degree) **2022 – Dec 2025**

Corporación Universitaria Empresarial Alexander von Humboldt (CUE) | Armenia, Colombia

CERTIFICATIONS AND ADDITIONAL TRAINING

Introduction to AI-Assisted Development (Curso de Iniciación al Desarrollo con IA) **Oct 2026**

mouredev / BIG School | Certificate of Attendance, 4 hours
